MHT 10120/10180/10225

HIGH CAPACITY TELESCOPIC HANDLERS

MHT 10120 / 10180 / 10225

3 models to choose from

ABSOLUTE SAFETY

SAFE and PRECISE usage

Ergonomic cab

The dashboard contains **all the information** you need (direction of travel, wheel alignment, boom angle, fuel level, hour meter, temperature level, filter clogging...).

As standard, **the longitudinal stability indicator**, coupled with a system which cuts off **aggravating movements**, allows all the **accessories** to be used in complete **safety**.

Load moment indicator

For absolute safety when carrying out complex handling, the load moment indicator (optional) allows you to define the working envelope parameters for each accessory at a given capacity.

\mathbf{JSM}° : everything in the palm of your hand

The hydraulic 'load sensing' system regulates the oil flow upon the operator's request, ensuring the handler's precise and smooth operation.

- Attachment function control
- Extension/retraction control for the boom
- Forward/backward/neutral movement selector switch

Capacity vs. machine build

Giving the **best compromise** between **lifting capacity** (up to 22.5 tons) and **machine dimensions**, the MHTs are easily transportable **and are ideal for manoeuvres on difficult terrains**.

Radio control

The radio control (optional) **eliminates all risk of errors** for precise handling operations which require **perfect visibility** and expertise in load placement. According to your needs, the operator can therefore position their load from outside the cab in closer proximity to the working area.

3 steering modes

PRODUCTIVITY

Lifting height

10 m

High capacity for heavy and large loads

From precast concrete to containers, from durable loads to the most fragile, the various MHT combinations and accessories answer all your needs.

Robust axles

The technology, similar to heavy duty handling equipment, is adapted to all-terrain conditions.

All-terrain Capability

A true all-terrain handling machine with class-leading performance: permanent 4 wheel drive, central differential, good ground clearance.

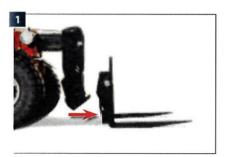

ADAPTABILITY

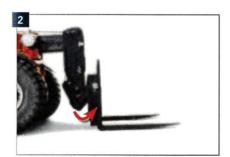

Your MANITOU truck is a real tool box...

Thanks to the MANITOU attachment system, you can easily and within seconds equip your handler with numerous attachments: winches, brackets, baskets, side shifts, tyre clamps, cylinder clamps...

MANITOU answers all your specific needs whilst maintaining made-to-measure accessories.

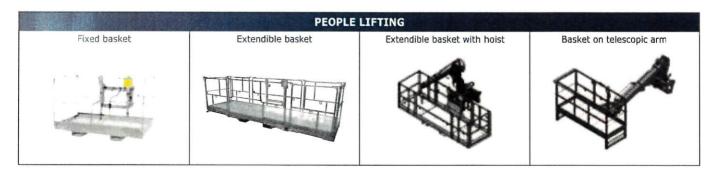

...for a multitude of applications

The adaptability of MANITOU trucks meets all your working needs and optimises work time and productivity:

- load placement
- suspended load placement
- lifting people...

MANITOU SERVICES

Tailor-made finance to make the best use of your funds

You can plan the purchase of your forklift with peace of mind by using MANITOU' financing opportunities.

You will have simple solutions adapted to your needs and seasonal requirements. If you want to make a rapid investment, consider asking us for a personalised proposal to take your situation into account.

* MANITOU Finance solutions are available in certain countries.

MANITOU maintenance contract

2 levels of maintenance adapted to your needs. You are sure of:

- equipment always in good working condition
- a reduction of repair costs as a result of regular servicing
- authentic standardised services

MANIPLUS extension of guarantee

With MANIPLUS you can take out an extension of guarantee of 12 or 24 months.

EASY MANAGER

A simple and flexible system for fleet management (with or without geolocation) to provide optimum service from your machines. EASY MANAGER gives you:

- real-time materials management
- simple and easy way of managing your machinery activity and maintenance.
- maximise your asset and safeguard your equipment

MANITOU spare parts

Utilising genuine MANITOU spare parts is sure to prolong the best performance capability of your machine. Your MANITOU dealer has access to a stock of 70,000 part numbers, available in 24 hours in Europe (48 hours outside Europe).
